CO-RE-GA is not advertised to the public

but right-thinking people are unwilling to gamble with its safety. The new tread looks good—the walls are painted . . . but underneath are hidden the strains and faults in the fabric and rubber, caused by previous blowouts or im-

proper inflation. ★ The *reclaimed* “acrylic” molding powder with its *new tread* of pink pigment looks almost as good as a *reclaimed* tire. But what about its safety for dentistry? ★ Special ingredients, oftentimes harmful to mouth tissues, must frequently be added to commercial molding powders to solve some difficult molding problem. That’s easy to understand. ★ And, just as hidden strains and faults may make the *reclaimed* tire a hazard to safety, so the composition of the *reclaimed* “acrylic” molding powder may make it unfit for dentistry. ★ And everybody in dentistry agrees that gambling with purity, to save pennies, has no rightful place in dental operations. ★ Specify *Lucitone*—the lifelike denture material made by DuPont specifically for dentistry. Results will justify your confidence.

**OVERCOME "DENTAL
DREAD" THROUGH
EFFECTIVE PAIN CONTROL**

YOU know from experience that patients have one trait in common: *instinctive dread of the pain they associate with necessary dental operations.*

Make dependable Cook and Waite anesthetic solutions your defense against this common threat to practice. Routine injections—even for cavity-preparation—of Novocain with Cobefrin or Novocain-Pontocaine-Cobefrin, the new saline-base Waite formula for profound, extended anesthesia—can do much to encourage your patients' confidence, advance your reputation.

These well-known solutions have proved dependably uniform, well-tolerated and free from undesirable side-effects through millions of successful injections.

Volume 2 • Number 6

First in Series of Monthly Meetings to Be Held on October 6 in the Palmer House

The Psychological Strategy of Handling People is the topic to be considered at the first monthly meeting of the season to be held in the Red Lacquer Room of the Palmer House on Monday evening, October 6. Chicago's eminent psychologist, Dr. George W. Crane, will be the speaker.

SPEAKER

Dr. Crane is a member of the American Medical Association, the American Psychological Association and the American Association of Applied Psychologists. He teaches Sales and Advertising, Child Psychology, Social Psychology and Vocational Guidance at Northwestern University. He is the author of several books including his *Psychology Applied*, now a classroom text in over 257 American universities and one that has been translated into practically every foreign language including Chinese. He is the originator of the column "Test Your Horse Sense" which appears daily in the *Chicago Tribune*. His articles are a regular feature of one of the proprietary dental magazines which is distributed throughout the Chicago area. He is married and the father of five youngsters, so he is no arm-chair theorist about love, marriage and child problems. The combined circulations of the newspapers which have made Dr. Crane available to their readers is over six million.

Dr. Crane has appeared before dental gatherings all over the country. He so impressed the members of the Ohio State Dental Society at their annual meeting in Columbus that some 1,500 have written to him for advice during the past twelve months. He has collected a lot of facts, and probably some fallacies as well, about dentists over the period of the years and shoots straight from the shoulder when questioned about them. He is the champion of the dental assistant and is even now conducting a poll seeking to find out the average wage and "condition of servitude" of these girls who are often the key to the dentist's success, although the dentist doesn't always admit it.

PALMER HOUSE

The Palmer House, where the regular monthly meetings of the Society will be held, is perhaps the most readily accessible hotel in Chicago. Ample inside parking facilities are available just across the street from the Wabash Avenue entrance. The beautiful Red Lacquer Room is equipped with chairs that are comfortable and furnishings that delight the eye. All, then, that is necessary to make this a perfect setting is to supply speakers who will produce the goods, and this the Program Committee, under the chairmanship of D. Munger Hodgman, promises to do.—James H. Keith.

Rockefeller Foundation Review of 1940 Activities Shows Greatest Need of Aid in Public Health Field

By MAYNARD K. HINE

A review¹ of the activities of the Rockefeller Foundation for 1940 has been released recently by Raymond B. Fosdick, President of the Foundation. Casual reading of this report indicates that the interest of the Foundation is widely distributed in many countries for many different types of educational and research work. Last year the appropriations of the Foundation totaled \$9,854,497 and it can be assumed that the money was distributed only after serious study of the need for the work. It is interesting to note that the officers of the Foundation felt the greatest need for aid was in the field of public health. In 1940 the Rockefeller Foundation helped to establish a school of public health in Michigan, sponsored a study of the yellow fever mystery in Africa, battled the *Anopheles gambiae* mosquito in Brazil and reported progress in developing prophylactic treatments for influenza. The Foundation also organized a health commission which was sent to Europe to aid the local government organizations to study health problems, sanitation, control of epidemics, reestablishment of local health services, and the urgent nutrition problems created by the war.

APPROPRIATIONS

Appropriations for research in the "natural sciences" totaled over \$2,200,000. The Foundation has supplied funds to construct two of the mightiest instruments the world has seen for the peaceful exploration of the universe, the giant cyclotron to study the inner structure of the atom and the mammoth 200" telescope which will explore the outer edges of the universe. It is conceivable that these two instruments may have great influence on all forms of human endeavor in the future.

¹The Rockefeller Foundation—A review for 1940. Raymond B. Fosdick.

The third major group of grants was made to support work in the social sciences, eight primarily in the field of international relations, two in connection with study of the amount and distribution of the national income, six in public administration and others in fields of industry, labor and social security.

Most of the Foundation's appropriations during 1940 in the field of medical sciences relate to teaching and research in psychiatry, neurology, and psychology. Harvard Medical School received four separate grants totaling over \$250,000 for work of this nature. No mention of dental research per se was noted, but it is our understanding that there are some Rockefeller fellows studying dental problems. It is to be hoped that in the future the attention of the Foundation can be focused upon research in dental problems.

EFFECTS OF WAR

Disturbing sidelights of the report were the discussions of the effects of the war on the activities of the Foundation. Their work was greatly curtailed in France, Egypt, Rumania, Hungary and other foreign countries; all educational endeavor in Europe has been disrupted. The following quotations from their report make this disruption quite vivid:

"In the shadows that are deepening over Europe the lights of learning are fading one by one. The conception of knowledge as an international responsibility has vanished. The free flow of ideas across boundary lines between laboratories and universities has dried up. . . . In two Czechoslovak universities during the winter of 1939 and 1940 hundreds of students were imprisoned and many were shot. Finally the universities were closed and most of the student

(Continued on page 25)

OCTOBER 6

The first meeting of the Chicago Dental Society for the 1941-1942 season will be held on Monday, October 6, at its new meeting place, the Palmer House. The Red Lacquer Room on the fourth floor will be the scene of this affair and the speaker will be Dr. George W. Crane, well-known psychologist, teacher and writer, who will discuss **The Psychological Strategy of Handling People.**

PALMER HOUSE

EDITORIAL

THE EDITORIAL STAFF

The activities of the Chicago Dental Society are many and varied. The roster of officers and committees published in this issue reveals that there are twenty-nine committees and approximately 370 members who have been elected or appointed to serve the Society. The function of these committees and the energy expended by the committee members will be directed primarily toward the improvement of public health, the continued development in usefulness and prestige of the Chicago Dental Society and the furthering of the welfare of each member of the Society. In order to keep the members of the Society adequately informed of what is transpiring in all the phases of present dental interest, the Editorial Board believes that a staff of contributors should be selected, each particularly interested in a certain division of activity and each capable of informing the readers of what is being planned and accomplished in that division. A discussion of the contributors selected and their assignments follows.

MONTHLY MEETINGS The monthly meetings are one of our most important activities. Formal discussions of the presentations are no longer in style and, as a rule, very little impromptu discussion develops from the audience. Critical analyses of the talks might clarify certain portions of them and serve as an incentive to secure better papers, particularly if the essayists are aware in advance that such a procedure will be followed. Dr. James H. Keith, a member of the Editorial Board, has accepted the task of writing the announcements and the discussion of the programs of the monthly meetings.

MIDWINTER MEETING Months of careful preparation are spent in building the Midwinter Meeting. The smoothness with which this meeting is invariably conducted lends the impression that it develops more or less spontaneously. Actually the officers and committees begin work on the meeting shortly after the preceding one is concluded. Members of the Society, interested in knowing how the plans are developed and what the meeting proposes to offer, will obtain advance information through the articles written by Dr. Frederick W. Nannestad. He was Chairman of the Information Committee for the last Midwinter Meeting and his experience in this capacity gives him an understanding of the entire Midwinter Meeting performance.

COMITTEE ACTIVITIES Many committees function for the Society throughout the year. The important plans, decisions and actions of these committees should be made known to the members of the Society as they develop. Dr. James D. Mer-shimer has been identified with committee activities in the Chicago Dental Society for a number of years and has a background which permits him to analyze the committee activities and select for publication information which will be of interest to our readers.

DENTAL RELIEF COMMISSION The activities of this important commission have been, and will continue to be, a source of considerable interest to the Society. The members should be kept well informed of the relief program and its accomplishments. Dr. Harold J. Noyes, who has been a member of the Relief Commission and is its present Chairman, will supply pertinent information on this subject.

EDITORIAL

LEGISLATION—STATE AND NATIONAL There is an obvious need for a profession well informed on the legislative programs proposed by organized dentistry and by the state and national governments. Dr. Harold W. Oppice will discuss these developments. He is Chairman of the National Health Program Committee of the American Dental Association as well as the Secretary of the Chicago Dental Society and is in a position to keep our members abreast of this field.

MILITARY AND NAVAL PROCEEDINGS Considerable importance will be attached to the military and naval programs, at least during the immediate future. These activities will, undoubtedly, affect all members in some manner, and all should be interested in this vital activity. Dr. Leo W. Kremer will cover these proceedings. He was a Captain in the United States Army Dental Corps Reserve.

QUOTATIONS AND ABSTRACTS The functions of THE FORTNIGHTLY REVIEW should include a review of current dental literature. Short digests of important technical and biologic studies which appear in periodicals that do not come ordinarily to the attention of the members of the Society should be published in our magazine in a concise and understandable manner. Dr. Maynard K. Hine, who is the Editor of the official publication of the American Association of Dental Editors, and consequently is in contact with practically all of the dental publications, will conduct this division.

DENTAL COLLEGES The Chicago Dental Society has the unique position of being more or less closely associated with four dental educational institutions where information of technical and educational value is being developed continuously. Brief accounts of these activities should prove to be interesting and stimulating. Information will be received through Dr. William P. Schoen, Jr., representing the Chicago College of Dental Surgery, Dental School of Loyola University; Dr. John M. Spence, University of Illinois, College of Dentistry; Dr. J. R. Schumaker, Northwestern University Dental School, and Dr. S. F. Bradel, Zoller Clinic, University of Chicago.

SPECIAL FEATURES The Society is concerned with many problems and projects which are not covered by the specific divisions above mentioned. In order to assure the coverage of such activities, a special features department has been formed. Dr. Waldemar A. Link, a member of the Editorial Board, will conduct this department.

Dentists, like other professional people, do not acquire much experience in writing, and while, undoubtedly, a number have the talent to write they do not have the opportunity or the training to develop properly their ability. The opportunity to write exists for the Editorial Staff and the Board of Directors has provided a means for training. Mr. Clem Lane, assistant city editor of the *Chicago Daily News* and a lecturer at Loyola University, has been engaged to give a study course in how to write interestingly. The staff of contributors and the branch correspondents have been invited to participate in this course. We believe that this instruction will be helpful and that interesting, readable articles will result.—Robert G. Kesel.

NEWS AND ANNOUNCEMENTS

ALLEGED VIOLATORS OF DENTAL PRACTICE ACT ARRESTED

The following information is contained in a report of September 4 issued by the Chicago Better Business Bureau:

"Acting upon the request of Emerson C. Whitney, supervisor of complaints for the Illinois Department of Registration and Education, Judge Albert Isley sitting in County Court at Chicago, on August 26 issued warrants charging two dental laboratories and seven individuals with violations of the Illinois Dental Practice Act. Arrests have been made in every instance and the cases continued to later dates.

"Although the informations naming the dental laboratories refer only to violations of the Dental Practice Act, the Bureau is advised they specifically charge them with illegal advertising, as defined in Section 5 of the recently amended Act. This prohibits dental laboratories from advertising their wares or services to the public. Such advertising, it is claimed, becomes a criminal violation of the Act, in view of a recent Supreme Court decision declining to enjoin public officials from enforcing it.

"The laboratories named and their respective addresses are A and P Dental Laboratories, Inc., with offices at 7 West Madison Street, 1620½ W. 47th Street, and 7814 South Halsted Street, and Excel Dental Laboratories, Inc., located at 32 West Washington Street, 11351 South Michigan Avenue, 4707 Irving Park Road, 6311 South Halsted Street, and 3068 Lincoln Avenue.

"Henry Prindiville and Donald B. Alexander, charged in the A and P warrant as having practiced dentistry without licenses, are said to have surrendered. Their cases have been continued to October 16. Alexander Young of the Excel Laboratories, also charged with

practicing without a license, has been arrested and his case continued to October 6.

"Albert E. Winner and Anthony Peterson of the Gum Gripper Laboratory, 127 North Dearborn Street, both charged with practicing without licenses and with illegal advertising, have also been arrested. Their cases have also been continued to October 6 and September 29, respectively.

"Others arrested were Otto Butz, 65 West Randolph Street and Harry Franklin, 3335 Evergreen Avenue."

CHICAGO DENTAL ASSISTANTS' ASSOCIATION

The Association will resume activities with the monthly meeting to be held on Thursday, September 18, 1941. An interesting program has been arranged for the evening by Program Chairman Ruth Reil. The guest speaker will be Dr. Carl Greenwald and his title is "Dentistry for Public School Children." Dr. Greenwald is Chief of the Dental Hygiene Unit of the Health Department, City of Chicago, and is well-known for his work as director of the dental care program which is being conducted in the schools. The meeting place is the North Assembly Room of the Stevens Hotel. A delicious dinner will be served at 6:30 p.m. in the Japanese Tea Room at a cost of eighty-five cents per plate. The business session will begin promptly at 8:00 p.m. Let's have a 100% attendance on "opening night."—*Grace A. Olsen, Publicity Chairman.*

DOCTORS' BOWLING LEAGUE OPENS SEASON SEPTEMBER 15

The Doctors' Bowling League, consisting of practicing dentists and physicians, will open its 1941-1942 season on

NEWS OF THE BRANCHES

WEST SUBURBAN

The first suggestion of fall comes with the announcement that dinner tickets for the branch monthly meetings are available . . . Chairman William Vopata feels that you will cooperate as long as these meetings help to keep up the good standard of organized dentistry. A night away from the office should be added enticement and that together with the club dinner plus a most interesting program should break down all possible resistance. Program Chairman Bernie Siegrist announced that the speaker for the first meeting on October 2 would be Dr. Harold Leuth, who will have as his subject, "Vitamins and Their Importance to Dental Health." If you are not asked to buy a ticket by one of the committee, please do not feel hurt as there are 410 members in the West Suburban Branch and it is pretty hard to contact everyone. Phone Bill Vopata at Euclid 7800 and he will be glad to take care of you . . . At the last meeting of the Round Table, Mr. Klann spoke on "The Technical Aspects of Appliance Construction for Bite Raising" . . . Add vacation notes: Larry Koch and family spent two weeks touring the Rockies and Yellowstone Park . . . Harry Nortell has been all through Colorado and Yellowstone this season and is marvelling at the fishing . . . Paul Betty just returned from his vacation. He saw F. E. Gillespie at Sister Bay. F. E. stayed until after Labor Day . . . Henry Stimson is touring Michigan and Jim McCoy has gone up to the North Woods looking for hay fever relief . . . Maxwell Cohan is resting his fractured ankle down in West Virginia . . . Ted Mose tick recently opened a new office in Berwyn . . . The R. C. McDonalds are second honeymooning at Mackinac Island . . . We were glad to see I. J. Kral and Beulah Nelson at the last meeting. Don't forget the Round Table Tuesday noon and the first monthly branch meet-

ing Thursday, October 2, with dinner at six-thirty at the Oak Park Club. Monthly meetings for the coming year are scheduled for Thursday, October 2, and November 6, 1941, and January 8, March 5 and April 2, 1942. Mark your appointment book now so that you won't forget to attend.—*Joseph M. Lestina, Branch Correspondent.*

ENGLEWOOD

When you read these lines the first meeting of Englewood, under the leadership of President Fleming and Secretary Cruse will be in the records. I am sure it is very safe to assume a large attendance and a splendid program. Sam N. Saletta, M.D. and our old friend, Joseph E. Schaefer, were the essayists . . . "Dental Education and Good Fellowship" vs. "All Opposition" is Englewood's slogan this year. This correspondent is in a bad spot as the first meeting falls on his wedding anniversary. I am afraid "All Opposition" will win the first round . . . We are glad to report that Norman Zaczovich is back in his office after undergoing an operation . . . We are also glad to report Pat Butler's family is getting back on its feet. Mrs. Butler is recovering from a very serious auto accident and Pat's son is much improved after a serious illness . . . Franklin Clemmer has been resting at his summer home in Michigan . . . We are sorry to report Ben Altman had his Labor Day week-end spoiled by an auto accident as he was leaving town. Ben suffered a back injury, not serious, but it has kept him out of his office several days . . . William Hillemeier spent a delightful vacation visiting Yellowstone Park, Grand Canyon and points West, including a return trip through Canada. The joy of homecoming was marred, however, when he found his office had been robbed during his absence . . . Robbers seem to have been busy last month. Manuel M. Robin was

held up in his office by two men asking the price for cleaning teeth . . . A card from Robert E. Englert, Englewood's crack shot with the sub-machine gun, rifle and pistol, informs us he is attending a National Rifle and Pistol match at Camp Perry, Ohio, in the capacity of assistant range officer . . . Frank Farrell has been spending his week-ends with his family at their summer home in Michigan. The Farrell's are looking forward to the joy of moving into a new Chicago home about October 1. Congratulations . . . Walter Laederach spent his period of relaxation at Lake of the Woods, Wisconsin. He isn't telling any fish stories but he insists he shot a 39 on nine holes—no mention of the other nine holes . . . Warren Lutton's son, Warren Jr., is in the Medical Corps at Camp Grant, Illinois . . . Milton Cruse has been up around Lac du Flambeau and spent most of his time watching it rain . . . C. L. Milton has moved his office from Morgan Park to 95th Street and Ashland Avenue . . . Ex-president and Mrs. Coffey spent Labor Day week-end up in Michigan's Traverse Bay country . . . The Southtown Dental Study Club is arranging an interesting program for its Thursday luncheon meetings. First meeting will be held on September 18 at the Englewood Y. M. C. A. . . . Our Program Committee has the program all lined up for October. Watch for special announcements . . . I am not going to put in print any fish stories brought back by Englewood fellows. After all there must be a limit. Most of them reminded me of the fellow who bragged about his 175-pound fish. A friend said, "That is nothing; while fishing off Miami, I hooked something I was sure was a whale. When I landed it in the boat I found it was an old lantern from an old boat sunk many years ago and it was still lit." "Wait a minute," said the first fisherman, "I'll take a 100 pounds off my fish if you will blow out your lantern."—Howard Alexander, Assistant Branch Correspondent.

WEST SIDE

The vacationers are returning and among them is William R. Gubbins, who spent much of his time sightseeing in the vicinity of Quebec, stopping a short time in Michigan on his return trip . . . Joseph (our secretary) and Mrs. Porto vacationed in Ottawa where they visited Mrs. Porto's brother, Commandant Frank Vaillant of the Royal Canadian Air Force . . . From Wisconsin come nearly all the fishing vacationists. Hal L. Allds caught three large fine muskies in Vilas County and Victor T. Gorecki filled up a large bag of fish at Crivitz. Edward J. Rus returned from Forest County where besides fishing he did some loafing, consequently withdrawing less of the big walleyed pike. Frank C. Bicha combined his customary fishing trip with visiting his parents at La Crosse and taking in the twin cities where he said he attained the best sun tan . . . Robert J. Bailey also returned from northern Wisconsin; however, there was no report of his fishing . . . George N. Frost, our West Side treasurer and family spent a week at Wisconsin Rapids. George is taking son Robert to Cedar Rapids, Iowa, to enter Coe College and another son, William, will soon earn his wings at a Texas airport . . . William A. Whittaker has been doing his fishing in northern Minnesota . . . Recently returned from Michigan are Lewis and Mrs. Dyer where they spent two weeks at Detroit and Nippersink. Their son drove to Yellowstone National Park for a three weeks' sojourn . . . Harry L. Brown and family spent the latter part of August in the Badger state. Their son, Harry J., was very prominent at the Interlochen Musical Camp where he was honored by having his picture on the cover of the program, as befits so industrious a young man . . . We are pleased to report Frank C. Perl is up and around again and looking very well . . . H. R. Williams, who has practiced in Chicago since 1904, moved his office to his home in Riverside on August 1 and

is very happy with his residential practice in that pleasant suburb . . . Eli Olech spoke on the subject of oral surgery at the Forum on September 9. The regular lecture programs will begin in earnest on October 1. Regarding the recent ballot of the West Side on a choice of meeting nights during the week, the Secretary reports a seventy-five per cent return with the results as follows: 1st choice, Tuesday, 2nd choice Wednesday, 3rd choice Friday and fourth choice Thursday . . . The chairman of the Entertainment Committee is seeking talent in our midst so if you are acquainted with any of the membership who are so talented along such lines as acting, dancing, singing or playing of musical instruments call Edward J. Rus, Crawford 0408 . . . A meeting of the officers of the West Side Branch was held on September 12 at which time a discussion of the program for the entire year was in order with the purpose in mind of increasing the attendance at the dinners. Ideas under consideration were dinner speakers, perhaps serial speaker, or entertainment by local talent, with a scientific paper concluding each meeting . . . Phone your news items to George Barnes, Nevada 6900, for the next issue of THE FORT-NIGHTLY REVIEW.—George F. Vogt, Branch Correspondent.

NORTH SIDE

With a pleasant summer to enjoy in retrospect, it is good to be back in harness. Could be this is a sign of advancing years, or maybe I just love my work? I'm assuming that my fellow members have also returned to the grind so how about some of you letting me in on some news . . . Otto Larsen has joined the Hall of Fame; he now belongs to the Walter Hagen Hole-in-One Club. On July 9, using his trusty No. 2 iron, he slammed that little white ball for an ace on the 7th hole at Wilmette Country Club. It was a short 195 yards for Otto . . . Lester Graffin and his son Jack were able to land a few big ones at Blayney, Michigan. Jack received his B.S. degree from

Northwestern University this spring and will enter the Medical School at Northwestern this fall. Lester has been appointed Visiting Dental Surgeon at the Swedish Covenant Hospital. Lots of action at the Graffins . . . Since May 1, Raymond Swanson has been enjoying his new offices at 3250 Foster Avenue . . . Samuel Rosenberg now has a downtown office . . . Walter Johnson spent a week at Land O'Lakes, Wisconsin, with little luck at fishing . . . After a week of fishing between rain drops at Manistique, Michigan, Bob Hasterlik gave up in disgust and decided in favor of Chicago . . . Manley Elliott, probably the hardest working dentist on the North Side, spent Labor Day with his children cooling his feet in the ravines at Turkey Run . . . A trip to his home in North Dakota resulted in somnambulism for one of our North Side members. We hear that, clad in pajamas, he left his apartment at three o'clock in the morning, made a short tour of the halls perhaps dreaming that he was still in a Montana hotel. After several unsuccessful attempts he finally found his own door . . . Aaron Swartz is in the North Woods angling for the proverbial big ones. Aaron must be a true son of Isaac Walter for he never comes home empty handed.—Roland Weber, Branch Correspondent.

KENWOOD-HYDE PARK

Yes siree sir! The first Kenwood meeting will be staged on the second Tuesday in October—October 14. If you feel a bit "rooty" and want to jar yourself out of the summer doldrums be sure to attend the first meeting. A perfect attendance record at Kenwood meetings will help to nudge you out of any rut into which you might have slipped. The first meeting promises to be one that will pack plenty of wallop, and you cannot afford to miss hearing one of Chicago's most dynamic and leading speakers. He will give you a staccato of word tonics that will aid you in regaining that old time feeling of progress. We are not permitted to divulge the name of

the speaker and other interesting items on the program, but the main speaker is a member of the board of directors of the Chicago Public Library and the Illinois State Normal School. He is a past national president of a well-known civic organization and is interested in all cultural and humanitarian efforts. Because of his broad vision and delightful personality and his vivid radio messages, he is a speaker of national prominence. Call Herbert Dangremond, Beverly 0094 and make your reservation for dinner Tuesday, October 14 . . . If you've been wondering why Charlie Waterman has been strutting with pride this summer we'll let you in on a secret. One of his daughters graduated from the University of Chicago after having been out of school for seven years. She plans to teach art. His youngest daughter was married in August. Charlie, who is an officer and charter member of the American Academy for Plastics Research in Dentistry, plans to attend the American Dental Association meeting in Houston where he will present a clinic. From Houston, he plans to go to San Diego to visit his ninety-one year old mother whom he has not seen for over twenty years . . . Your correspondent had a card from Howard Shepard who is in northern Wisconsin and says that the fishing is good despite the heavy rains . . . Don't forget, October 14; mark it off in your appointment book now. More about the program in the next FORTNIGHTLY REVIEW.—Howard E. Strange, Branch Correspondent.

NORTH SUBURBAN

The first branch meeting of the season will be held at the Orrington Hotel in Evanston on Tuesday evening, October 14. Details of the program will appear in the next issue of THE FORTNIGHTLY REVIEW. Willard McEwen and his Dinner Committee have been busy selling season tickets. Eddie Baumann and Howard Dunn, the Northwest team, have been up and down the streets over here getting nearly 100 per cent coopera-

tion, which sort of sets a goal for the rest of the Branch. The reports of the outlying precincts are beginning to come in. The boys along the Northwest Highway crave a little space in THE FORTNIGHTLY REVIEW—they want to see what their names look like in print. So here goes! President H. P. Kelder of the Northwest Credit Association is busy preparing programs for another banner year. The exact details are to be announced later . . . Several of the fellows report some very interesting vacations. C. A. Cameron motored to Lake Louise and Glacier Park. As usual, he took along his trusted motion picture camera, and is accepting bids for private and public showings right along now . . . W. A. Fanning and Frank Lindberg, the Barrington duo, tried a Labor Day fishing trip in northern Wisconsin and ran into the flooded area. Having left their water wings behind, they had to make a hurried exit. An unconfirmed rumor has them finishing their vacation by fishing for carp in the Des Plaines River . . . W. F. Denneman traveled to the Black Hills, while George Cary preferred the quiet atmosphere of Twin Lakes . . . R. W. Schulze, our itinerant golf champ, reports shooting in the seventies consistently. He is open to any and all challengers, with or without strokes; ask and he will give, so it is said! . . . The only unpleasant item we picked up concerned A. F. Pagel, one of the new boys in Park Ridge. He has been very ill for a good portion of the summer, but we are happy to report that he has made a fine recovery and is back on the job again.—J. D. Pett, Assistant Branch Correspondent.

NORTHWEST SIDE

With the summer vacation in its dying moments and just the memories left, it is pleasant to be able to enjoy the other man's vacation as recorded on celluloid. Hank Boris enjoyed himself a good deal while showing pictures of his trip west and up to Alaska to a very appreciative

audience at the home of Herman Wenger. This would make quite an after dinner subject for a branch meeting. I wonder if I dare suggest it to Waldo Link? . . . Hugh Larkin joins the ranks of fathers-in-law by marrying off his daughter. She will live in Louisiana, where her husband is in the service . . . Wallace Davis has joined all the rest of us oldsters who have decided that though they may call it soft ball, what it does to dental fingers is not soft. Of course, since Wallace was smart enough to have it happen to a left hand there was very little time lost from the office . . . The list of Northwest Siders who are going to Houston for the American Dental Association meeting is increasing right along. At the last counting those going were W. Davis, N. Desenis, D. Klein, H. Neer, H. Wenger, G. Cartwright, and Joseph

Zielinski . . . Wally Boeck has done things up in fine style. After completely redoing his office, the x-ray machine seemed out of place so that was replaced with a new one. Then since one must also carry out this scheme of things which says that all is right, we see Wally blossom forth with a new Lincoln Zephyr. . . . At last reports, we find that the October meeting of the branch will be held at the Lions Club on Friday, October 17. So mark your book now and call Irv Neer for your dinner reservation . . . Of a total membership of 426 in the Northwest Side Branch there were only 129 individual contributions for the American Dental Association relief seals. For something that is purely the dentist's own child a better showing should be made.—*Ben Davidson, Branch Correspondent.*

NEWS AND ANNOUNCEMENTS

(Continued from page 10)

Monday, September 15, at 10:00 p.m. and on each Monday thereafter. The bowling alleys are located at the Western Recreation, 63rd Street and Western Avenue. All members are invited to join whether expert bowlers or not. For further information, call the secretary, Dr. V. B. Milas, Republic 0083. Interested members are asked to join immediately but may make reservations after September 15.

LETTER FROM DR. SIDNEY McCALLIN OF LONDON

A letter postmarked in London on August 13 was received in the Society office on September 2. The sender was Dr. Sidney McCallin, a member of the Chicago Dental Society since 1905 and a Life Member of the Illinois Dental Society. Dr. McCallin has been practicing in London for many years but has continued his membership in the Society. The letter was an apology for the delay in sending in his dues but he blamed the war, stating that, "That is our excuse for all shortcomings." He also states, "My windows have been blown in several

times and I have been sticking plaster on the window in front of my dental chair. We are not allowed glass replacements. I should like to own a glass factory after the war. But somehow we carry on in London and know that the day will come when we can celebrate peace. What a day that will be!"

DR. NEWTON THOMAS AUTHOR OF NOVEL

Announcement has been received of the publication on September 16, 1941 of a novel by Dr. Newton J. Thomas. Its title is *The Long Winter Ends*. Mr. Harold Latham, Vice-President and Editor-in-chief of the Macmillan Company, one of America's largest publishers, states that Dr. Thomas' manuscript is one of the finest pieces of Americana that it has been his pleasure to publish. He further states that the story is an amazingly authentic picture of life in the raw American West where men were miners for the moment, but would be teachers, engineers, even musicians later on. Dr. Thomas is well known to many members of the Chicago Dental Society who will be deeply interested in his achievement.

ROCKEFELLER FOUNDATION

(Continued from page 6)

body was deported for forced labor in Germany. In Holland in 1940 as in Poland in 1939, there were many arrests and deportations of students and professors. . . . Condition of university life and standards on the continent is now little short of appalling. Over all the continental universities hangs the pall of uncertainty and fear. In such surroundings scholarship withers and only through heroic struggle keeps itself alive. When the German Minister of Justice tells the Association of University Professors that the old ideal of objectivity was nonsense and that today the German university professor must ask himself one question: 'does my scientific work serve the welfare of National Socialism?' he is voicing a doctrine which if broadly applied spells the end of Western scientific thought.

The end of the day has come in which Claude Bernard could say: 'I give small thought to where the truth will lead me, provided that I find it.' . . . Even neutral countries are under pressure to permit a totalitarian interpretation in the teaching of such subjects as economics, political science and sociology."

Depressing statements these. Surely no one can give a fair estimate of the far reaching consequences of the present war in Europe, or can calculate its profound and widespread influence on the life and activity of every human in this generation and for several more to come.

Only in an atmosphere of freedom can the lamp of science and learning be kept alight. In all the history of man knowledge has never flowered in a subject people. Only free men dare to think and only through free thought can the soul of the people be kept alive.

Are you going into the Army?

Several men are budgeting all of their business. Then when and if they are called to active service they will leave few OPEN accounts to worry about.

They have learned what you can easily prove if you try it for yourself—it is EASY to "Budget" your accounts.

OFFER THE BUDGET

CONTRIBUTING FACTORS

To a successful practice are many—one important one is the recommendation of the proper tooth brush. Many of the profession claim the Butler is that brush. Convince yourself, and then add your name to this outstanding group.

Where the Subway Will Concentrate Traffic

In every city where subways have been built, appreciation of the effect of concentration of traffic has brought success to many businesses.

When the Chicago Subway begins operation, the Field Annex Building, within a short one-half block of the State and Washington Street exits, will be even more centrally convenient than at present.

To physicians and dentists seeking a location that will materially help in building up their clientele, this factor is vital.

Joe. Wilk Dental Labs
225 N. Wabash
Chicago

Dear Joe:

I used your Durallium for four years now and find it all that anyone would ever want for cast restorations, but as you know I never could use your plate department. But now that you have this fellow Robbins, I took the chance of sending you a different upper and lower which had been made over twice by one of the big laboratories in town. I don't mind telling you that the plates I got back from you went to place exactly as they had been on the try-in and my patient and I are both very happy. I've never met Mr. Robbins, but look forward to visiting you next Wednesday and want to personally congratulate him on the type of work he is turning out for you.

Here speed to you and as usual, best of luck!

DENTIST

Wilk-Criterion Dental Labs.

Chicago, Ill.

Dear Mr. Wilk:

Since Dave Robbins has joined your organization I have had my first opportunity to learn something about your laboratory. I must say that I am highly pleased with the manner in which my account has been handled, the service given, and the courtesy of your entire personnel. Of course, the workmanship is still the same as Dave Robbins gave me these many years and it goes without saying that that's "the best." I just wanted you to know that it has been a pleasure to do business with you.

Sincerely yours,

[Signature]

CHICAGO

Friend Joe:

Now I think you know the answer to all these questions you asked me about why I didn't send you plate work when I used so many of your Durallium castings. I told you as soon as you got a good plate man I would be happy to send all my work to you, and I think you now see what was behind that statement.

I have kept my word since you have had Dan Robbins. Now you have better than a good plate man. You've got tops and I'll see to it that some of my friends use your laboratory, because your Durallium is good and your plate work is now the best in the city.

Congratulations!

Wilk-Criterion Labs
225 N. Wabash
Chicago, Ill

Gentlemen—

I sent you my first denture last week after receiving advertising from you for nearly a year — and I just wanted you to know that I consider this workmanship better than any I have ever gotten in a commercial lab. If all of your work is as good — it will be a pleasure to send it to you, but I'm hoping this is not beginners' luck.

Your very truly,
[Signature]

... that's what they are saying up and down the land—in cities, on trains, on airliners—all over America.

There's a friendly ring to that farewell. Friendly, because it means something real and warm—a definite place.

And you hear people say that with conviction, too. Conviction, because they know this great, friendly Hotel through both experience and reputation. They know that they can see their friends and associates at The Stevens any time ... as a convention delegate or as transient guest ... in casual meetings in the lobby or perhaps in one of the dining rooms.

"I'll be seeing you at The Stevens." Of course. That's what traveling America is saying—saying with gusto and plenty of enthusiasm.

STABILITY IS ONE ESSENTIAL IN EVERY CAST REMOVABLE. This can be accomplished only when the clasp has the degree of resilience necessary to spring over the height of contour and return to a firm gripping relation.

YOU WILL ALWAYS FIND THIS QUALITY IN GOLD-PLATINUM alloys. There is reserve strength and physical efficiency insuring proper function.

INSIST ON GOLD — YES, SAYING DEE GOLD
to your dealer and laboratory does pay.
